

# Acássio Marques

## About me

Over 15 years on the market building robust applications. Passionate about technology and innovation. Experience with agile teams, where the need for adaptation is a constant.

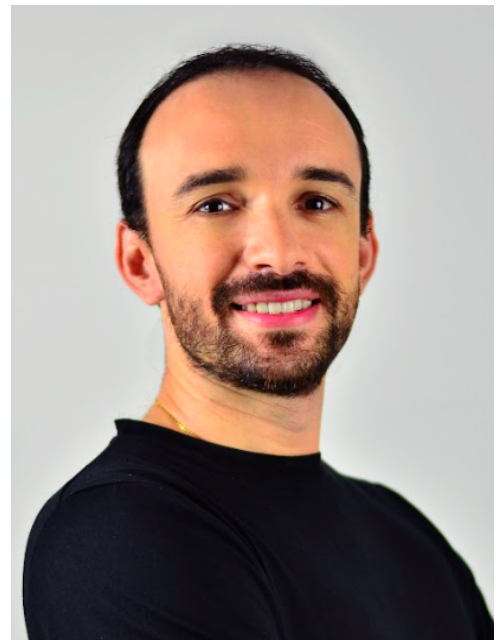

## Experience

**Software Eng. Specialist** - 02/2020 to 04/2022  
**PagSeguro / PagBank**, Goiânia, GO, Brazil

- Led the team in order to deliver high quality products in applications with over 13 million users.
- Delivered features that made it possible to reduce dependence on third-party services and also allowed the company to increase its revenue.
- Production environment monitored consistently, through the creation of alarms and dashboards to quickly act and solve any impact on the user experience. (CloudWatch, NewRelic, Grafana, OpsGenie)
- Promoted to Software Engineer Specialist after 1 year at the company.
- Led the team in the planning phase, creating flowcharts to better understand the problem and find the right architecture for each specific situation, in addition to keeping it well documented.
- Applied agile methodology values to deliver solutions.

**Full-stack Developer** - 11/2017 to 02/2020  
**Tilix Digital – Fintech Startup**, Goiânia, GO, Brazil

- Successful migration from monolithic PHP application to serverless microservices: AWS Lambda Functions (Go Lang) + AWS Api Gateway
- CI/CD using CircleCI / BitBucket Pipelines / Github Actions
- Promoted to Senior after one year at the company.
- Startup was acquired by PagSeguro/Pagbank, one of the biggest digital banks in Brazil.
